OBJECTIVE

Web Developer, Software Developer

PROJECT

Multitenant Database Creator- , Developed a full-stack web application using Node.js and Express.js for multitenant database creation, Enabled user registration with unique Gemini mail ID generation and tenant-specific data handling, Implemented server-side rendering for frontend with secure authentication and validation, Ensured data isolation for each tenant to maintain privacy and scalability, Designed the system to be easily extendable for onboarding new clients or organizations

One Cart E-commerce Website- Developed a full-featured e-commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), Implemented key features like product listing, user authentication, shopping cart, and order management, Designed responsive UI with React for a smooth user experience across devices, Used MongoDB for dynamic product and user data storage with secure backend APIs in Node.js/Express, Focused on clean code structure, modular components, and scalability for future business needs

Airbnb Full-Stack Project- I developed a full-stack web application resembling Airbnb using Node.js, Express.js and EJS templating engine. The backend is built with REST APIs to handle various functionalities such as user authentication, listing management, booking system, and reviews. For the database, I connected to MongoDB , For the front-end, I used ailwind CSS to build a responsive and modern UI, ensuring an intuitive and user-friendly experience across all devices

Weather Forecast- Created a react-based Weather Forecast app that provides users real- time weather information Users can input locations, receiving up-to-date weather data and enhancing their planning decision-making

CryptoPulse- CryptoPulse is a responsive web application that tracks real-time prices of major cryptocurrencies like Bitcoin, Ethereum, Solana, and more using WebSocket technology. It provides live updating charts, 24-hour historical price data, and export options in PDF format

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS,

Backend: Node.js, Express.js, REST API, MongoDB, EJS

Version Control: Git, Github

EDUCATION

Bachelor of Technology , Govt. Engineering College Ajmer

Higher Secondary (12th) , KIC Inter College, Balrampur, UP

CERTIFICATIONS

MERN Stack Development From KG Coding

Frontend Website Development From EISystem

Signal And System From DRM Jaipur

CURRENT INTERNSHIP (ONGOING)

Currently working as a Web Development Intern at Fuel it Online From Jaipur, contributing to MERN stack-based web application development
